

Architectural cross-section of a building showing structural details and dimensions. The drawing includes a roof with a 35% pitch, a chimney, and a staircase. Dimensions are provided in meters: total height 5.47, roof height 3.53, chimney height 2.58, and ground levels at +0.49 and +0.37. A 3.36m horizontal offset is also indicated.

This architectural elevation drawing shows a building facade with a red-tiled roof. The facade features several windows and doors, including a large central door and smaller windows. The drawing includes elevation markers: +0.37 on the left and +0.53 on the right. The roof is depicted with a pattern of red tiles, and there are three small structures on the roof, possibly chimneys or ventilation units. The building is shown in a side profile, with a hatched area on the right indicating an adjacent structure or ground level.

This architectural cross-section drawing illustrates the internal structure and ventilation of a building with a tiled roof. The roof is shown with a series of red tiles. Inside the building, there are several rectangular openings, likely windows or doors, and a large, multi-paned window on the right side. The drawing also shows the internal walls and floor structure, with a hatched area indicating a foundation or base. Two chimneys are visible on the roof, with arrows indicating the flow of air or smoke. The overall layout suggests a complex ventilation system designed to manage air flow within the building.
